E-6 Worker Receptor and Student Receptor Cancer Risk Summary

Summary of Maximum Worker Cancer Risk

Unmitigated	Mitigated	Receptor ID	Scenario
4.67	0.82	158	Construction -16 years from 2020 to 2035
0.59	0.52	14	Operational - 25 Years at 2040 Emission Level
< 5.03	< 1.1	158	Construction + Operation

Cancer Risk in this table is in unit of one in a million

			Construction -16 years from 2020 to 2035		**Operational - 25 Years at 2040 Emission Level**		**16years Construction + 25 years Full Operation**	
Receptor ID	**UTM_X**	**UTM_Y**	**Unmitigated**	**Mitigated**	**Unmitigated**	**Mitigated**	**Unmitigated**	**Mitigated**

Acute Hazard Index - Based on Unmitigated Maximum Hourly Construction Emissions

(note for construction, construciton of each plot is not overlapping, therefore the calculation was based on the max hourly emission for each plot, calculated each plot's AHI and find the max to represent the result at one receptor location)
