Appendix E:
Health Risk Assessment Spreadsheets

E.1 - Project Construction Diesel PM Emissions
E.2 - Project Operational Diesel PM Emissions
E.3 - Project Construction and Operational AERMOD Model Output
E.4 - Project Construction and Operational Diesel PM, Residential Cancer Risk (2020-2049) and Cancer Burden
E.5 - Project Full Operational Diesel PM and Residential Cancer Risk (2040 -2069)
E.6 - Worker Receptor and Student Receptor Cancer Risk Summary
E.7 - Project Chronic Non-cancer Hazard Index
E.8 - Project-Related PM and TOG Emissions and Acute Non-cancer Hazard Index
E.9 - Assessment of Mortality and Morbidity

Note: All AERMOD input and output files are available digitally by contacting the City of Moreno Valley. They are not included herein to save paper resources.

World Logistics Center

Estimation of Operational Emissions - Emergency Generators

Unmitigated Scenario is Diesel Tier III generators; Mitigation measure is non-diesel generators

Generators:	1	per 1.5 million sf	Source: Highland Fairview 7/17/2013
Total Project Size	40.6	million sf	Source: Project Description
Generators:	27	total	
Generator Size:	314.9	horsepower	Source: Highland Fairview 7/17/2013 (235 kw)
Testing Schedule	50	hours/year/generator	Source: SCAQMD Rule 1470 (c)(2)(C)(i)
	1	maximum hours/day/generator	

Emission Rate for Tier III Diesel Engines

Pollutant	Emission Rate (g/hp-hr)	Peak Emission Rate (g/sec)
HC	0.1	0.008747222
PM	0.1	0.008747222

Source for HC, NOx, CO, PM: Kohler Power Systems, 200REOZJF, 60 HZ Diesel Industrial Generator Set, Emission Data Sheet. Source for CO2 and CH4: CalEEMod Appendix D, Table 3.4, OFFROAD Equipment Emission Factors for Generator Sets, for year 2015, between 251 and 500 horsepower.

Annual Emissions per Generator

Pollutant	Emissions (g/year)	Average Emissions (g/sec)
HC	1574.5	4.9927E-05
PM10	1574.5	4.9927E-05

Emissions from Emergency Generators

Project Phase	**Building Area (sq ft)**	**Percentage of Total**	**Number of Generators**	**HC (g/sec)**	**PM10 (g/sec)**
1	22700000	55.91%	15	7.56E-04	7.56E-04
2	17900000	44.09%	12	5.96E-04	5.96E-04

E-3 Project Construction and Operational AERMOD Model Output

ESA

E.3: Project Construction and Operational AERMOD Model Output

Appendix E.3 contains the AERMOD project files for all construction and operational diesel particulate matter, unit emission rate was used in the dispersions modeling.

Construction model includes 1,017 volume sources. Operation model includes 7033 sources that represent the operational onsite emissions, local surface street emissions, and freeway emissions.

The AERMOD project files are not included to reduce paper consumption but project files are available on a separate CD.

E-4 Project Construction and Operational Diesel PM, Residential Cancer Risk (2020 – 2049) and Cancer Burden
