1) VOC offgassing emissions from Curbing/Drive Approaches and Paving are calculated in CalEEMod Output Files, however, the offgassing emissiona are not included in the this table because VOC emissiosn are calculated outside of CalEEMod and are incorporated in the Regional Maximum and Localized worksheets.

1) VOC offgassing emissions from Curbing/Drive Approaches and Paving are calculated in CalEEMod Output Files, however, the offgassing emissiona are not included in the this table because VOC emissiosn are calculated outside of CalEEMod and are incorporated in the Regional Maximum and Localized worksheets.

1 CalEEMod Default VOC Emissios Factor for Parking Lot Paint

2 Current Standard for Traffic Coatings in SCAQMD Rule 1113

http://www.aqmd.gov/home/rules-compliance/compliance/vocs/architectural-coatings/tos

The emission factor (EF) is based on the VOC content of the surface coatings and is calculated estimated using the equation below:

$$EF_{AC} = C_{VOC} / 454(g/lb) \times 3.785(L/Gal) / 180(sqft)$$

Where:

EF = emission factor (lb/sqft)

C = VOC content (g/L). This varies by location and year

Mitigated Emission Factors and Emissions (Tier 4 Interim NOx standard or better)

Parameter	NOx
Emission factor (g/hp-hr)	1.29
Emissions (lbs/day) - per facility	3.08
Emissions (tons/year) - per facility	0.40
Emissions (lbs/day) - Project Build Out	83.05
Emissions (tons/year) - Project Build Out	10.80

Note: Emission factors for mitigated Tier 4 Interim (CalEEMod User's Guide, Appendix D, Table 3.5)

Notes:

The most common propane fueled yard tractor at the port in 2006 was the Kalmar PT122, year 2004 (http://www.portoflosangeles.org/DOC/REPORT_Air_Emissions_Inventory_Volume2.pdf). According to www.kalmarind-northamerica.com/source.php/1390193/ Kalmar%20Logistics%20brochure.pdf, for the Ottawa tractor, there are 3 types of tractors listed: 4x2 off-road terminal tractor, whic has a Tier 3 off-road engine; 4x2 DOT/EPA Terminal Tractor, which is 2010 Clean Idle Certified; 6x4 DOT/EPA Terminal Tractor, which is 2010 Clean Idle certified. According to the Technical Data for Kalmar 4-wheel Drive TR618i RoRo Tractor, it has a Tier 3 off-road engine.
